

SOFTWARE LAB 2

CHANDRARAJ PATIL

PES1UG24AM425

1) EPIC, STORIES AND STORY POINT ASSIGNMENT

The screenshot displays the Jira SLO board interface. On the left, the 'Epic' panel shows 'Hyperlocal Courier Dispatch & Tracking System' with a key of 'SLO-1', 5 work items, and 5 completed items. The main board area shows 'SLO Sprint 3' with a 'Plan your sprint' section. On the right, the 'Jira work item' panel lists child work items with their status and completion percentage.

Work	Pri...	Stor...	As...	Status
✓ SLO-2 Create Courier Request	H	5	U	Done ✓
✓ SLO-3 Assign Nearest Delivery Rider	H	5	U	Done ✓
✓ SLO-4 Optimize Multi-Stop Delivery...	H	8	U	Done ✓
✓ SLO-5 Track Delivery and Live GPS...	H	8	U	Done ✓
✓ SLO-6 Verify Delivery Using OTP	H	3	U	Done ✓

2)SPRINT BORAD , ACTIVE SPRINT

The screenshot displays the Jira SLO board interface with the 'Active sprints' tab selected. The board is divided into three columns: 'TO DO', 'IN PROGRESS', and 'DONE'. The 'TO DO' column contains three items: 'Create Courier Request', 'Assign Nearest Delivery Rider', and 'Optimize Multi-Stop Delivery Route', each with a story point value and a status icon.

Item	Story Points	Status
Create Courier Request	5	Not Started
Assign Nearest Delivery Rider	5	Not Started
Optimize Multi-Stop Delivery Route	8	Not Started

3) BURNT DOWN CHART

1ST SPRINT – 3 STORIES

2ND SPRINT – 2 STORIES

REFLECTION AND ANSWERS

1. Did your estimations reflect the actual effort?

Yes. The story-point estimates generally reflected the actual effort. The simpler OTP verification story required less effort, while GPS tracking and route optimization were more complex and were assigned higher story points.

2. Was your backlog well-prioritized?

Yes. The backlog was prioritized according to business value and user impact. Courier request creation and nearest-rider assignment were given the highest priority because they are essential for starting the delivery process.

3. How did your simulated sprint align with your plan?

The simulated sprint aligned well with the plan. The five user stories were added to Sprint 1 and progressed from **To Do** → **In Progress** → **Done** according to their priority and ranking.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed how quickly the team's remaining work decreased during the sprint. It helped indicate whether the team was on track to complete the planned work and provided insight into the team's capacity and progress.
